Continuation of 11. does NOT place the application in condition for allowance because: With regards to the applicants arguments, the applicant alleges "Chen et al. clearly teaches the fact that 'tantalum containing compound may still be in the chamber is a problem". No where does Chen et al. disclose that tantalum containing compound being in the chamber is a "problem". Furthermore the applicant alleges "those skilled in the art would increase the duration of the purge and/or pump evacuation to prevent the tantalum containing residue". The examiner cannot find a basis for this statement in Chen et al, and the applicant has not disclosed a basis for this statement.
